

Slide Adapter 5x7 with Drop-in Plate

N°2 for M2
lamature ø2.5

Slide Adapter 5x7 with Hasselblad H attachment Drop-in Plate

This new Sliding adapter is the product of our long experience in the manufacturing of professional cameras for high resolution digital photography. The stitching facility enables the photographer to almost double the file size of his image by shooting two images, side by side, and joining through software. This option gives the photographer many possibilities over the standard chip format and angle of view of lenses available

Completely re-designed with a new system of drop-in adapter plates and with further improved characteristics of the sliding movement and overall precision. The new drop-in system, allows the quick substitution of adapter plates; adapter plates are available for Hasselblad V, H, Leaf AFI and Mamiya 4,5x6 attachments. The digital back can be positioned either horizontally or vertically according to the needs.

The Silvestri standard 4 points fitting make it directly usable on our cameras: Bicam, S5 micron and T30 without any other accessory. There are also several adapter solutions for the most popular view cameras of other brands, by mean of interchangeable adapter plates or adapters integrated within the back.

Codice	Descrizione
