

REPRO STAND

The Silvestri Repro Stand alone or in combination with the Repro Light Box is the perfect tool for the reproduction and digitization of transparent negative and positive originals in black & white or colour. Unlike the use of scanners, which are often expensive and very slow, this system is fast and flexible.

The Silvestri Repro Stand offers limited dimensions, absolute precision, easy micrometric adjustment, especially in the short distance; 1/1, 1/2 etc. the progressive control of the focusing occurs at the same time facilitating the double operation.

The camera stays in place without the need for locking. The Repro Stand has 4 adjustable feet for a perfect levelling of the plane and the arm of the column has a further adjustment for the perfect camera levelling.

REPRO STAND

In combination with the Silvestri 4x5" Light Box it allows the copying of originals up to 4x5 ".With a full frame 35mm camera and the 50mm lens it is possible to reproduce A4, 21x29.7 originals on the plane.
